AND THERE'S EVEN MORE TO IDENTIFY

SYSTEMS · MATERIALS · PRODUCTS

Whilst we've got your attention, we would like to take this opportunity to make sure you know about all the other things that we sell, because over the last 13 years we've developed our business with some ground breaking products and we'd like to share them with you!

Lasers – We've been selling lasers since day one, so we've got lots of experience that you could benefit from and we've got some great systems that could transform your business too.

Take a look at our range of low cost **Epilog** lasers. We can offer larger lasers too, so whatever you need – we can definitely help!

Materials – Overleaf is a Special Offer on rigid materials, but these are only a small part of our range, which is the biggest available anywhere. We have the best which is our **Rowmark** range and the best of the rest with **IPI**.

Why not discover even more about our extensive range, by asking for our new materials catalogue.

Badge Printing – The latest in badge printing is the **Millennium 750** which is

a neat little machine printing badges with a highly durable full colour image. It's a great add on to your business too.

Rotary Engraving – We have a range of engraving systems to suit everyone. Call us for details.

Sublimation – We have without doubt the biggest and best range of high quality sublimation printable materials available anywhere and they're good value too!

Ink Jet Printers – This technology is solving lots of problems where high quality images are required at small scale. Printing without pre-treatment on almost any surface is proving to be a real advantage.

All in all Identify has some great machines and a fantastic range of consumables – See our website for more details
